

PROFESSIONAL SUMMARY

Highly motivated and adaptable Computer Engineering student with hands-on experience working on multiple real-world projects and internships. Skilled in web development, databases, cloud technologies, and problem-solving. I enjoy learning new tools, building practical solutions, and contributing effectively to team-based projects. With strong analytical skills and a continuous learning mindset, I aim to deliver impactful results in dynamic and fast-paced environments.

KEY EXPERTISE

ReactJS HTML5 Front-End Web Development Django Node.js development MongoDB PostgreSQL
Oracle Database backend development Database Management AWS EC2 S3 Web API API Testing English
NLP AIML OpenCV Javascript Redhat Linux Python

EDUCATION

MIT Academy of Engineering, Pune B.Tech. - Computer Engineering CGPA: 7.47 / 10	2022 - 2026
ARMY PUBLIC SCHOOL, Pune 12 th CBSE Percentage: 82.60 / 100	2021
ARMY PUBLIC SCHOOL, Pune 10 th CBSE Percentage: 91.20 / 100	2019

AWARDS AND SCHOLARSHIPS

- Got first prize in Intercollege basketball competition
- Got participation certificate for the AVINAYA

INTERNSHIPS

Markytics IT / Computers - Software Full Stack Developer Intern Key Skills: Figma AIML ReactJS Django Github Git SQL PostgreSQL API Testing API Working as a full stack developer on two real-world web applications, contributing to both frontend and backend development. Developed responsive UI components using React.js, HTML, CSS, JavaScript, and integrated them with backend APIs. Built and optimized backend services using Django Designed and implemented REST APIs, handled database operations, and ensured smooth data flow across systems. Collaborated with the development team in planning, testing, and deploying application features. Gained hands-on experience in Git, API integration, debugging, performance optimization, and writing clean, maintainable code.	01 Aug, 2025 - 01 Jan, 2026
DRDO (HEMRL) Technology Full Stack Developer Key Skills: HTML5 JScript SQL CSS Oracle Database Apache Tomcat Built and deployed an "Online Photography Requisition System" during internship at HEMRL (DRDO), Pune. Developed the application using JSP, HTML, CSS, and JavaScript for the front-end. Integrated Oracle Database for secure data storage and management. Deployed the system on Apache Tomcat, ensuring reliable performance. Delivered the project within the stipulated timeline under the guidance of DRDO scientists.	09 Jun, 2025 - 31 Jul, 2025

PROJECTS

Attend AI - AI-based attendance system

01 Apr, 2026 - 15 Apr, 2026

Team Size: 1

Key Skills: Django OpenCV TensorFlow ReactJS PostgreSQL Python REST API

Project Link: <https://github.com/Kedar09-stark/Attend-AI>

Developed an AI-based attendance management system that automates student attendance using facial recognition technology. The system captures images through a webcam, identifies students using computer vision techniques with OpenCV, and records attendance in real time through a web interface built with React and Node.js. It also includes features like attendance tracking, search/filter, and report export

HR: TALENT ACQUISITION

01 Sep, 2025 - 31 Oct, 2025

Team Size: 1

Key Skills:

JWT (JSON Web Tokens), Python, Django Framework, HTML5, CSS3, JavaScript (ES6+), React.js
Natural Language Processing (NLP) Machine Learning (ML) PostgreSQL Google API

Project Link: <https://github.com/Kedar09-stark/Talent-HR>

The AI-Driven Recruitment System is a web-based hiring platform that automates and optimizes the recruitment process using AI and NLP. Built with Django and Django REST Framework for the backend and React.js with Tailwind CSS for the frontend, the system enables seamless job posting, resume screening, and candidate shortlisting. It leverages the Google Gemini API for intelligent resume parsing, skill extraction, and candidate–job matching, generating accurate relevance scores without traditional ML pipelines. PostgreSQL stores structured data, while resumes are securely uploaded and processed through Django’s file-handling system. For security and scalability, the platform integrates Firebase Authentication (OTP and Google Sign-In), JWT-based authentication, and AWS cloud services. Recruiters access analytics dashboards to visualize hiring trends and performance. Overall, the system reduces manual effort, minimizes bias, and improves hiring efficiency through AI-powered automation.

A Website Connecting Excess Food from Hotel chains to Hunger Relief Efforts.

02 Feb, 2024 - 30 Jun, 2024

Team Size: 1

Key Skills: Front-End Web Development Web Development Django ReactJS PostgreSQL

Project Link: <https://github.com/Kedar09-stark/Mealshare>

We have identified the use of mobile technology to reduce food waste management and built an android mobile application that allows individual user or restaurants to donate and share their foods and leftovers with people in need. In order to reduce that food wastage problem through android application we planned to do this project. In this project the guest can login & enter their Location, amount of food and type of food available. Then a simple notification is given to the agent. After seeing the notification of the agent among that location can login & can gather the details of the donor. The donor can hold an account in this application & whenever there is food wastage, he can login and enter the details of food and location. The agent can also hold an account and can retrieve the details. After retrieving the details of the agent can collect food from the donor and can redistribute to the orphans or others. This project is food redistribution is an enormously successful social innovation that tackles food waste and food poverty. The user’s details are maintained confidential because it maintains a separate account for each user.

Crop Yield Prediction Using Machine Learning

Mentor: Mrs. Aarti deshpane | Team Size: 4

Key Skills:

Machine Learning (Supervised Learning) Frontend Development: HTML, CSS, JavaScript, React.j
Database Management: MySQL
Programming & Development: Python (scikit-learn, TensorFlow, Pandas, NumPy), API Development (Flask/Django)
Data Visualization: Matplotlib, Seaborn, Plotly

Project Link: https://github.com/Kedar09-stark/MahaBhoomi-crop_predictor

Developed a machine learning model to predict crop yields based on weather parameters, soil properties, and historical yield data. The project involved data collection, preprocessing, and model training using algorithms like Linear Regression, Random Forest, and Neural Networks. The model provides insights for farmers to optimize resource allocation and enhance agricultural productivity. Implemented the system with a user-friendly interface for ease of access.

ASSESSMENTS / CERTIFICATIONS

THE COMPLETE WEB DEVELOPMENT COURSE

Provider: UDEMY

Key Skills: Front-End Web Development Web Development

Journey to cloud : envisioning your solutions

Provider: IBM

Key Skills: Cloud Computing

AWS Academy Graduate - AWS Academy Cloud Foundations

Provider: AWS

Key Skills: AWS Cloud Services Cloud-Computing AWS Storage Networking

Gained expertise in AWS core services like EC2, S3, RDS, and Lambda, along with IAM, VPC, and security best practices. Learned cloud computing, networking, storage, and deployment concepts. Hands-on experience in AWS CloudFormation, monitoring (CloudWatch, CloudTrail), and cost management.

Python Full Stack

Provider: Eduskills Academy

Key Skills: HTML5 CSS Javascript ReactJS Bootstrap Python RESTful API Development MySQL

Python Full Stack Development Certification

Built and deployed full-stack applications using Python (Django/Flask) for backend and React.js for frontend.

Designed and implemented RESTful APIs and database management systems (SQL & NoSQL).

Integrated user authentication, data security, and cloud deployment (AWS/GCP).

Worked on real-world projects, applying Agile methodologies and DevOps tools.

PERSONAL INTERESTS / HOBBIES

- Reading about technology and innovation
- Fitness or gym
- Listening to podcasts about startups and AI

IMs

- Lync - www.linkedin.com/in/sumit-kedar-742629256

PERSONAL DETAILS

Gender: Male

Marital Status: Single

Current Address: PLOT NO 110 OM PARK PHASE 9,
MANJARI BK PUNE, Pune, Maharashtra, India - 412307

Emails: kedarsumit155@gmail.com , kedarsumit053@gmail.com

Date of Birth: 30 Jun, 2003

Known Languages: English Hindi Marathi German
